

CASH MANAGEMENT ANALYTICS TOOL

Making E-Banking Easy

Mastery in
Software
Engineering

FORTECH.

Key Facts

Industry: FinTech

Team Size: 8 People

Duration: 1+ Years

Technologies:

.Net Core 2.0, C#, Angular 4,
PostgreSQL, Docker, GIT

Services:

Project Management,
Software Development,
Software Testing

Highlights

- Complex e-Banking web application for real-time visibility of banking estates.
- The team at Fortech developed the UI application and rewrote legacy code.
- A continuous improvement practice was adopted.

Solution

The solution is a complex web application that offers real-time visibility over the entire banking estate of a user. Also, it allows users to transfer on-demand large sums of cash from one account to another, from one currency to another and even from one continent to another. Thus, the solution enables the organization of cache moves for optimal returns.

Therefore, users can reap the benefits of keeping their extra money in a high interest account and earn the maximum amount of interest on their funds.

Collaboration

The customer approached Fortech to develop a UI application for their existing banking back-end. The project started in the third quarter of 2017 with one person and grew gradually to a team of eight: one project manager, one software architect, and multiple software engineers.

Fortech has been responsible for requirements analysis, planning and documentation management, software development and quality assurance. The team has rewritten legacy code, performing frequent releases into production through the adoption of a continuous improvement practice.

Also, they assessed the production environment and the source code. Moreover, the team at Fortech developed new services and performed software testing activities.

Client Benefits

SPEED:

Fast prototyping, development followed by frequent releases into production .

RAMP-UP:

The ability to fast ramp-up the team as the project evolved.

SKILLS:

Mixed seniority team with a strong technical know-how.

ABOUT FORTECH

Fortech is a Romanian software development company headquartered in Cluj-Napoca. Employing more than 700 software engineers and growing, Fortech is one of the largest software outsourcing providers in the region, recognized by Deloitte and EY as one of the fastest growing technology companies in Central and Eastern Europe.

Fortech provides full stack custom software development and software testing services, with focus on solutions for Automotive, Healthcare, eCommerce, FinTech and the Internet of Things. Since 2003, two hundred clients chose Fortech as their software engineering partner, among which T-Systems, Swisscom, Symantec, Pfizer and Renault.
