CASH MANAGEMENT ANALYTICS TOOL

Making E-Banking Easy

Mastery in Software Engineering

FORTECH.

Key Facts

🏭 Industry: FinTech

👥 Team Size: 6 People

📅 Duration: 2 Years

</> Technologies:

.Net Core 2.0, C#, Angular 4,

PostgreSQL, Docker, GIT

⚙ Services:

Project Management,
Software Development,

Software Testing

Highlights

● Complex e-Banking web application for real-time visibility of banking estates.

● The team at Fortech developed the UI application and rewrote legacy code.

● A continuous improvement practice was adopted.

Solution

The solution is a complex web application that offers real-time visibility over the entire banking estate of a user. Also, it allows users to transfer on-demand large sums of cash from one account to another, from one currency to another and even from one continent to another. Thus, the solution enables the organization of cache moves for optimal returns.

Therefore, users can reap the benefits of keeping their extra money in a high interest account and earn the maximum amount of interest on their funds.

Collaboration

The customer approached Fortech to develop a UI application for their existing banking back-end. The project started with one person and grew gradually to a team of eight: one project manager, one software architect, and multiple software engineers.

Fortech has been responsible for requirements analysis, planning and documentation management, software development and quality assurance. The team has rewritten legacy code, performing frequent releases into production through the adoption of a continuous improvement practice.

Also, they assessed the production environment and the source code. Moreover, the team at Fortech developed new services and performed software testing activities.

Client Benefits

SPEED:
Fast prototyping, development followed by frequent releases into production .

RAMP-UP:
The ability to fast ramp-up the team as the project evolved.

SKILLS:
Mixed seniority team with a strong technical know-how.

ABOUT
FORTECH

Fortech is a top Romanian software development company headquartered in Cluj-Napoca. With a workforce of 800 people, Fortech has been repeatedly recognized by Deloitte, EY, and Forbes for its fast-growing, entrepreneurial journey.

With expertise and a strategic focus across healthcare, financial services, automotive sectors, and more, we cover the end-to-end software lifecycle development to deliver the innovation, scalability, quality and speed our clients need.

Our approach to software engineering combines strong technology and process know-how, Agile delivery methods, and a blend of code quality practices and metrics refined in almost two decades. Since 2003, two hundred clients chose Fortech as their tech partner.
