

ACCOUNT INFO & PAYMENTS PLATFORM USING OPEN BANKING APIs

Mastery in
Software
Engineering

Key Facts

-  Industry: Fintech
-  Team Size: 6+ People
-  Duration: 1.5 Years (Ongoing)
-  Technologies:
 - .NET Core,
 - Kubernetes
-  Trends: Open Banking

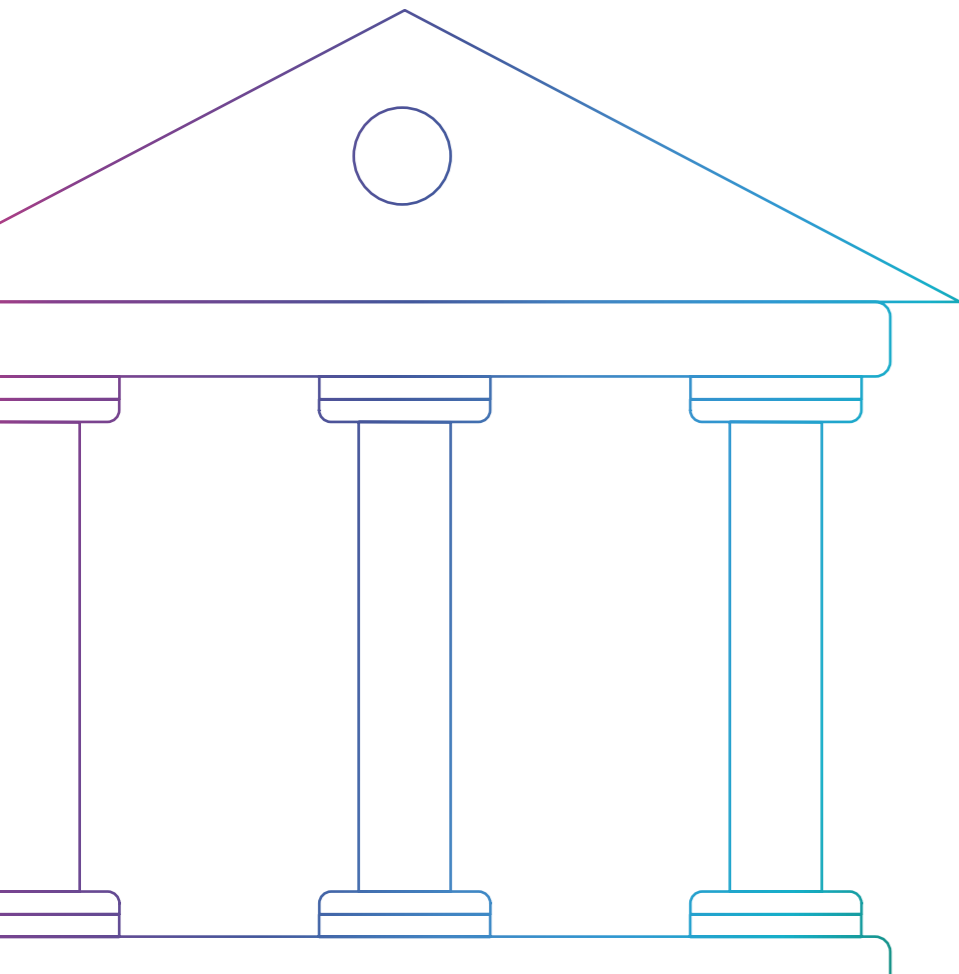

Highlights

- Universal Open Banking API Platform providing access to account information and facilitating payment initiation.
- The platform is developed by following strict security practices and is 100% regulatory compliant with the EU directives for financial services.
- As a reliable technology partner, Fortech develops the platform by scaling up their engineering team, while supporting the client in their global expansion.

Solution

The solution is a platform that integrates open banking APIs and provides clients with an easy and secure way to access account information from financial institutions and initiate payments. At the same time, it provides financial companies with a consistent and easy to use toolkit and enables them to build modern and regulatory compliant financial applications.

Collaboration

The client is a fintech company that leverages Open Banking to facilitate the integration of APIs by Third Party Providers (TPPs). When we started the collaboration, the client was looking for a software company experienced in software development for the financial sector to help scale-up their engineering teams fast.

Starting with four senior software engineers, our teams fully integrated into their development environment. In just 6 months, we doubled the size of the initial team and then kept growing it up to 10 engineers. We expect the expansion to continue at least at the current rate.

Fortech is thus a significant part of the client's team, a truly reliable technology partner. The goal of our partnership is to develop and fuel the global scaling of the API platform.

Client Benefits

-  Fast team ramp-up capabilities (from 4 senior engineers to a team of 10 members in under 1 year)
-  Proven cultural fit and easy integration of Fortech engineers into existing client teams
-  More than engineering, a reliable technology partner – facilitating onboarding and knowledge transfer, security trainings and IT operations, among others

ABOUT FORTECH

Fortech is a top Romanian software development company headquartered in Cluj-Napoca. With a workforce of 800+ people, Fortech has been repeatedly recognized by Deloitte, IAOP®, EY, and Forbes for its fast-growing, entrepreneurial journey.

With expertise and a strategic focus across healthcare, financial services, automotive sectors, and more, we cover the end-to-end software lifecycle development to deliver the innovation, scalability, quality and speed our clients need.

Our approach to software engineering combines strong technology and process know-how, Agile delivery methods, and a blend of code quality practices and metrics refined in almost two decades. Since 2003, over two hundred clients chose Fortech as their tech partner.
